### **Statement by House Education Chairman Proctor on the Release of New Data from the State University System**

**Tallahassee Fla.** – Representative Bill Proctor (R-St. Augustine) today released the following statement regarding new data from the State University System indicating upward trends in enrollment, as well as SAT/ACT scores.

“Newly released data by the State University System shows continued increased enrollment in our state’s universities, as well as newly admitted university students scoring higher on the SAT/ACT.

“This data is indicative of the competitiveness of our State University System and will serve to increase the entry level standards of our state’s universities.

“Higher entry level standards are critical in not only maintaining the competitiveness of our university system, but in ensuring that universities continue to offer academically rigorous coursework.”
